Pine Cellular Announces Wireless 4GLTE Service

Pine Cellular, the mobile communications company that serves thousands of residents in Southeast Oklahoma, announces the Introduction of **4GLTE High Speed Internet Service delivery to Wireless Devices.**

Pine Cellular is also proud to announce the launch of 4GLTE Internet High Speed Wireless Broadband Internet for Home and Office, and now for your personal wireless device.

This new **Internet service offers the extreme Internet Speed** rural America expects and deserves. Pine's 4GLTE coverage area includes Antlers, Idabel, Broken Bow, and Hugo. Additional Southeast Oklahoma internet coverage areas are planned. Pine's goal is to service it's existing cellular coverage with the best value for Home High Speed Broadband Internet Service and on Pine Cellular Wireless Devices which are available under one roof, which makes Pine a complete telecommunications provider.

New Wireless Devices will be featured soon in Initial Pine selected Locations, with additional 4GLTE markets planned for the near future.

Pine Cellular is a division of Pine Telephone and has been an Oklahoma based company since 1984, offering mobile communications devices and service plans. Pine Telephone has served southeast Oklahoma for over 100 years.
